

PTFE heated hoses. Built around your application.

Company & product overview | Hot melt transfer / OEM / Replacement enquiries

Hose production workshop in Huizhou, Guangdong, China. Company-supplied photograph.

A manufacturing focus

Gongbang PTFE focuses on PTFE heated hose assemblies and custom hose projects for industrial buyers. Our work includes hose production, fitting preparation and assembly, with project requirements reviewed from a sample, drawing or existing hose reference.

Our product scope

PTFE heated hoses for hot melt transfer, replacement hose enquiries and OEM / ODM assemblies. Equipment shown in workshop photographs is production equipment; complete hot melt machines are not offered in this catalogue.

Custom assembly appearance

Product enquiry	What it covers	What we review
PTFE heated hose	A heated transfer assembly for the specified hot melt process.	Medium, temperature, pressure, length, bore and control requirements.
Replacement hose	An alternative assembly assessed against an existing hose reference.	Original part number, fittings, sensor, power and connector pinout.
Custom assembly	A configuration developed around the installation.	Routing, movement, cover, termination and electrical requirements.
OEM / ODM project	A repeat supply or development enquiry based on drawings or a sample.	Drawing revision, sample review, quantity and order documentation.

Product photographs show appearance only. Medium and installation suitability are reviewed for the selected configuration.

Ordering principle

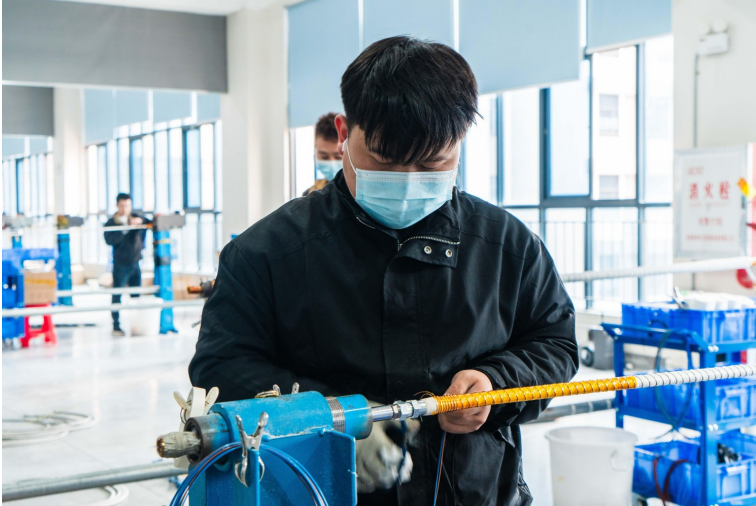

Photographs identify appearance, not a universal rating. The accepted specification and supplied product identification define the ordered configuration.

Independent replacement enquiries

Third-party brand names identify customer equipment only. Gongbang PTFE is not affiliated with or endorsed by Nordson, Robatech, ITW Dynatec or Meler. No brand-wide interchangeability is claimed.

Inside the workshop

Real company photographs, with clear process captions.

Finished hose assemblies photographed together.

Manufacturing information

Gongbang PTFE specialises in electric heating hoses, custom-sized PTFE tubes and braided hose assemblies. Our 10,000-square-metre site brings together production, fitting preparation, assembly and quality inspection. Factory location: Building 8, Floors 1-4, Jinhuan Yu Yungu, Huicheng District, Huizhou, Guangdong, China.

The legal selling entity is identified in the quotation and invoice. Workshop photographs do not constitute certification or a test report.

From reference to quotation

A short path for distributors, maintenance teams and equipment builders.

01 / Send a usable reference

Send the hose label, overall photograph, both fluid fittings and both electrical connectors. Add the machine model, original part number and drawing if available.

02 / Review the configuration

We review the requested mechanical and electrical details with you. Unidentified connections or missing ratings must be resolved before a replacement is confirmed.

03 / Agree the order

The quotation identifies the proposed configuration, quantity, price basis, delivery arrangements and any agreed warranty. Samples, inspection documents and packaging requirements are discussed before acceptance.
